Reconciliation of Non-GAAP Financial Measures and Regulation G Disclosures

Assured Communications®

Regulation G Disclosures

To supplement our condensed consolidated financial statements presented in accordance with U.S. generally accepted accounting principles (GAAP), we provide additional measures of segments' operating income (loss), non-operating income (loss); cost of product sales and services; engineering, selling and administrative expenses; income before income taxes and minority interest; income taxes; minority interest; net income (loss); and net income (loss) per diluted share adjusted to exclude certain costs, charges, expenses, gains and losses. Harris management believes that these non-GAAP financial measures, when considered together with the GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period. Harris management also believes that these non-GAAP financial measures enhance the ability of investors to analyze Harris' business trends and to understand Harris' performance. In addition, Harris may utilize non-GAAP financial measures as a guide in its forecasting, budgeting, and long-term planning process and to measure operating performance for some management compensation purposes. Any analysis of non-GAAP financial measures should be used only in conjunction with results presented in accordance with GAAP. A reconciliation of these non-GAAP financial measures with the most directly comparable financial measures calculated in accordance with GAAP follows:
